

Ch 7.5 Midsegment Theorem

Midsegment of a Triangle- is a segment that connects the midpoints of 2 sides of a triangle.

Midsegment Theorem- the midsegment is half as long as the leg that is parallel to the midsegment.

Triangle Proportionality Theorem- If a line parallel to one side of a triangle intersects the other two sides then it divides the two sides proportionally.

Converse of the Triangle Proportionality Theorem-

If a line divides two sides proportionally, then it is parallel.
